

Sinochem Lantian Co., Ltd. (hereinafter referred to as Sinochem Lantian) is an enterprise jointly established by Sinochem Group (a Fortune Global 500 company) and the State-owned Assets Supervision and Administration Commission (SASAC) of the People's Government of Zhejiang Province. After years of development, it has formed a strategic development pattern with fluorine chemical as its core business sector while taking overall planning for pharmaceutical distribution, engineering design and other business sectors.

We have built the world's largest TFA and other trifluoro series production plant. It is the only legitimate enterprises to product bromotrifluoromethane. And it has a great advantage in many fluorinated products, such as hexafluoropropylene oxide, hexafluoroisopropanol and 2-bromoheptafluoropropane.

Relying on 30 million tons fluorite reserves, 300 thousand tons fluorine chemical products and 5 thousand tons R113a as a support, it is a guarantee of adequate and affordable raw materials.

Our Strengths

Strong R&D capability: Zhejiang Chemical Industry Research Institute, Zhejiang University, Chinese Academy of Sciences.

Complete production platforms: Kg-model labs, Pilot plants, Multi-purpose manufacturing plant, We can also build designated manufacturing plant with independent Class D clean room areas according to specific customer's demands from 1 kg to 400 tons.

Advanced management systems: ISO9001, ISO14001, OHSAS18001, DuPont HSE system, TFS audit: passed the audit of 'Together for Sustainability' by both SGS and Eco Vadis.

Advantage technology: The R&D groups have special advantage at fluorination, chlorination, high temperature bromination, dehalogenation, hydrogenation reduction, oxidation, telomerization and so on. Our products include pharmaceutical intermediates, pesticide intermediates and fabric finishing agents.

Customized chemicals

No.	CAS No.	中文名称	Product name	Purity
1	81290-20-2	三氟甲基三甲基硅烷	Trimethyl(trifluoromethyl)silane	99.0%
2	422-77-5	2-溴七氟丙烷	2-bromoheptafluoropropane	99.0%
3	753-90-2	三氟乙胺	Trifluoroethylamine	99.0%
